Professional training tailored to your needs

Learn

Customized workshops for any level of expertise

Biomax offers professional training to help our customers take full advantage of the powerful capabilities of Biomax software in their daily work. Workshops are available for all Biomax products as well as special topics, such as user and project management.

These proven workshops have been developed based on the previous needs of our customers and are further tailored to meet your company's unique needs. They are designed to address any level of expertise: beginners, expert users, administrators and developers. Contact us for more information about the specific topics covered in each workshop.

Additionally, if you are looking for training on a specific topic or workflow, let us know. We are happy to tailor a course to your unique requirements.

Apply

Hands-on training using your own data

We have made an extra effort to make our trainings as convenient and rewarding for you as possible.

- > Biomax bioinformaticians present the material with easy-to-understand visual presentations and software demonstrations.
- > Hands-on exercises using the software and your own data help reinforce the techniques.
- > Training manuals and other course materials are provided for each participant.
- > Trainings may be held on-site at your location or at Biomax's dedicated training center.
- > Attendance for each workshop is limited to ensure the highest quality, personal instruction.

Leverage

Get the most out of your software investment

Biomax Professional Training can help you take full advantage of the powerful capabilities of Biomax software in your daily research.

- > Introductory workshops — get a quick start with the software and learn how to best use the main functions in your daily work.
- > Expert workshops — learn to fully use the software's advanced functionality (special features and command-line interface) to get the greatest benefits in your work. At the end of this training you will be able to use all functions of the software.
- > Administrator workshops — develop a sophisticated understanding of Biomax software. You will receive practical training that covers the skills necessary to install, maintain and customize the software to meet your company's specific needs.
- > Developer workshops — use the BioXM™ knowledge management system as a development platform. You will learn to integrate your own services into the BioXM system and extend its core functionality to meet your exact research needs.
