

"We contribute to a world that makes better decisions, where everyone benefits from the evolving collective knowledge of living systems."

For more than twenty years, Biomax has developed innovative software products and solutions based on a configurable, multifaceted and scalable knowledge-management platform. Our customers from all branches of life science appreciate the simplicity and the functional added value of these custom-designed solutions.

We, the fifty people at Biomax, are deeply engaged and collaborate with high standards. We are steadfast, multicultural, communicative, trustworthy, appreciative, open, customer-oriented and ready to navigate new paths with our solutions.

To strengthen our product management department, we are searching for someone to fill the following position at our location in Planegg, near **Munich**, as soon as possible:

Computational Life Scientist (m/w/d)

Your responsibilities:

- You create solutions for and with our customers.
- You perform decomposition and abstraction of complex biological or medical questions into actionable concepts.
- You take care of solution development and customer-specific configuration of the Biomax product portfolio, particularly during the implementation of complex business processes into the corresponding user-friendly visual interfaces.

Your profile:

- Relevant academic education (e.g., Master of Bioinformatics or of Molecular Biology, Genetics, Medicine or Medicine Information Technology with deep knowledge in the area of Computational Life Sciences)
- Solid and wide knowledge of the data types and formats, data banks and data analysis methods in Molecular Biology and Genetics or in clinical environments
- Several years of subject-related work experience in Computational Biology or Medical Information Technology is preferred
- Experience in user-interface design, knowledge management, semantic web technologies and scripting in a Linux environment is desirable
- Strong analytical thinking with the ability to quickly familiarize yourself with new subject areas
- Enjoyment in building a solution by yourself that will be intensively used by customers
- Very good written and spoken English
- Focus on quality, ability to work in a team and creativity

Our offer:

- Varied and challenging job with responsibility
- Organization with a flat structure and quick decision processes
- Challenging and technically interesting environment with international customers
- Pleasant work atmosphere and attractive renumeration package
- Independent work
- Flexible working hours
- Possibility to work from home
