

Sophic Systems Alliance, Inc.
Integrated Life Science Solutions

Press Release

FOR IMMEDIATE RELEASE- FOR IMMEDIATE RELEASE- FOR IMMEDIATE RELEASE

Biomax Solutions Changes Name to Sophic Systems Alliance, Inc. and Executes Expansion Strategy

Falmouth, MA – October 5, 2005 – Biomax Solutions Inc. today announced that the company has changed its name to Sophic Systems Alliance, Inc. “We are adding new software development companies to our portfolio of products,” explained Patrick Blake, Chief Executive Officer of the company. “We have had significant success teaming with Biomax Informatics AG and are now expanding our alliance to include new members under a more appropriate name. Sophic means knowledge, and our strategy is to build a broad alliance focused on leveraging knowledge to fight complex diseases.”

Last month, Sophic was awarded a GSA Schedule Contract, making it possible to sell directly to Federal Government Agencies. “With our GSA Award and our successes in the Federal market, we are well positioned to compete for opportunities in the government research agencies,” Blake explained. Sophic is opening an office in Washington, D.C. which will be the headquarters for an expanding professional services practice. “Our consultants will implement software, provide scientific consulting services and develop custom applications for agencies doing life science research,” Blake said. Sophic is a Service Disabled Veteran Owned Small Business (SDVOSB).

Sophic will maintain the Corporate Headquarters in Falmouth, MA and will continue to sell, implement and support software modules in the commercial market throughout the US and Canada.

About Sophic Systems Alliance.

Sophic Systems Alliance, Inc. (SSA) is an integrator of bioinformatics software development companies and provides a full range of professional services. SSA sells, markets, implements and supports the delivery of a broad range of software modules developed by Biomax Informatics AG, Geospiza, Inc. and other members of the alliance. The company is focused on providing professional services to scientists and agencies in Washington, D.C. including scientific consulting and custom bioinformatics software development. Customers include government research organizations, pharmaceuticals, and biotech companies. More information is available at www.sophicalliance.com.
