BIOMAX INFORMATICS launches BioXM™ Knowledge Management Environment version 5.3

PLANEgg, Germany — (24 July 2015) — [Biomax Informatics AG](http://www.biomax.com) announces the rollout of the [BioXM™ Knowledge Management Environment](http://www.biomax.com/bioxm) version 5.3 with new features that continue to improve the performance of the system and allow it to easily adapt to emerging techniques in the life sciences and beyond. In particular, BioXM v5.3 introduces new layout options for biological network visualization, dynamically determined direction of relations and new options for faster graph overlays.

“BioXM version 5.3 enhances the graph capabilities, providing more layout options and speed,” explained Dr. Sascha Losko, Head of Product Management at Biomax. “Our focus was to improve performance and flexibility of the visualization of biological networks in all areas. That includes more options to dynamically overlay information such as experimental data, analysis results or other data resources. The direction of relations visualized in the graph viewer can now be determined dynamically based on associated metadata, which is particularly useful, for example, for the visualization of fluxes in metabolic pathways.”

BioXM v5.3 is available immediately. See <http://www.biomax.com/bioxm> for more information.

About the BioXM™ Knowledge Management Environment

The BioXM Knowledge Management Environment is a project-centered, distributed software platform that provides a central inventory of information and knowledge. Users create, manage and visualize scientific models as an extendible network of interrelated concepts. The BioXM platform facilitates communication and collaboration across research & development departments and integrates seamlessly into existing IT environments.

About Biomax

Biomax Informatics AG is a leader in the development of computational solutions for the life sciences. Biomax provides the BioXM™ Knowledge Management Environment and other computational solutions, including the [Viscovery®](http://www.viscovery.com) data-mining technology, for better decision making and knowledge management in biomarker

identification, patient stratification and targeted medicine. They help customers generate value by integrating information from proprietary and public resources to enable a knowledge-based approach to developing innovative life science products. Biomax's worldwide customer community includes medical clinics, companies and research organizations that are successful in drug discovery, diagnostics, fine chemicals, food and plant production. More information about Biomax is available at www.biomax.com.
