Biomax Informatics' new BioXM™ version 6.0 raises the bar on knowledge management for the life sciences

PLANEgg, Germany — (28 August 2017) — Biomax Informatics AG, leading provider of knowledge management for the life sciences, announces a major release their flagship product, the BioXM™ Knowledge Management Environment. BioXM version 6.0 includes enhancements for an evolving user community and several new features for working with the BioXM portal interface and knowledge graphs. BioXM v6.0 is available immediately.

BioXM version 6.0 extends the third generation of the BioXM web portal system with new stacks (widgets that load asynchronously) including grids, tiles and buttons that allow users to easily build dashboard-like web portals for intuitive analysis and exploration of their complete knowledge base. The latest BioXM release also offers new search features in the BioXM knowledge graph, which include a faceted search and result aggregation using any ontology integrated into the BioXM system. It also introduces an extended plug-in system based on custom properties and a custom property admin user interface.

“This new major release of the BioXM product line addresses the needs of our diversifying user community,” says Dr. Sascha Losko, Head of Product Management at Biomax. “We are especially excited to introduce features based on direct feedback from our users that help us create the best user experience possible and make the BioXM platform fit for virtually any research area.”

Visit <http://www.biomax.com/bioxm> for more information or meet Biomax at the following upcoming events: Defense Innovation (3-5 October 2017 in Tampa, Florida, USA), BioJapan (11-13 October 2017 in Yokohama, Japan) and MEDICA 2017 (13-16 November 2017 in Düsseldorf, Germany).

About Biomax

Biomax Informatics AG is a leader in the development of computational solutions for the life sciences. Biomax provides the BioXM™ Knowledge Management Environment and other computational solutions, including the Viscosity® data-mining technology, for better decision making and knowledge management in biomarker identification, patient stratification and targeted medicine. They help customers generate value by integrating information from proprietary and public resources to enable a knowledge-based approach to developing innovative life science products. Biomax's worldwide customer community includes medical clinics, companies and research organizations that are successful in drug discovery, diagnostics, fine chemicals, food and plant production and healthcare. More information about Biomax is available at www.biomax.com.

About the BioXM™ Knowledge Management Environment

The BioXM Knowledge Management Environment is a project-centered, distributed software platform that provides a central inventory of information and knowledge. Users create, manage and visualize scientific models as an extendible network of interrelated concepts. The BioXM platform facilitates communication and collaboration across research & development departments and integrates seamlessly into existing IT environments.
