

LabVantage Biomax thrilled to announce the release of BioXM Knowledge Management Environment Version 8.0!

June 06, 2024

Since its introduction, BioXM has powered hundreds of customer solutions answered tens of thousands of users across the life sciences, revolutionizing how we manage and interpret biomedical data. BioXM Version 8.0 is a major upgrade, offering cloud-readiness, significantly enhanced performance, and support for the latest technologies, including the newest Java version, for improved security and functionality.

BioXM empowers agile solution building, enabling tailored solutions for customers through configuration rather than extensive software development. This flexibility allows for rapid adaptation to specific research needs, ensuring efficient and effective data management.

At the heart of BioXM is its powerful semantic layer, enabling semantic data integration for seamless aggregation and analysis of diverse data types. Utilizing advanced knowledge graphs, BioXM constructs a sophisticated network of relationships within your data, uncovering hidden patterns and driving innovative research. With robust knowledge modeling capabilities, researchers can create dynamic models that reflect the complexities of biological systems.

Additionally, BioXM serves as the foundation for specialized platforms like ALLANI, our discovery platform designed to enhance research capabilities, and NICARA, tailored for advancements in brain sciences. Both platforms leverage BioXM's comprehensive framework to deliver cutting-edge solutions in their respective fields.

Join us in accelerating scientific discovery with BioXM Version 8.0. Visit our website to explore how BioXM can transform your research.

Let's push the boundaries of biomedical science together!

About Labvantage-Biomax

Biomax offers software solutions for better decision-making and optimal knowledge management in the life sciences industry. Using the company's software, customers can generate added value through the integration of information from their own and public resources, enabling them to achieve a knowledge-based approach for the development of innovative life sciences products. Biomax's global customers include clinics, companies, and research institutions successful in the fields of research into active substances, diagnostics, fine chemicals, and food and plant products. Further information can be found at www.labvantage-biomax.com.
